

Topic: Structure: Baby bear's chair

National Curriculum Objectives which are covered in this unit:

Design

Pupils should be taught to:

- Design purposeful, functional, appealing products for themselves and other users based on design criteria.
- Generate, develop, model and communicate their ideas through talking, drawing, templates, mock-ups and, where appropriate, information and communication technology.

Make

Pupils should be taught to:

- Select from and use a wide range of materials and components, including construction materials, textiles and ingredients, according to their characteristics.

Evaluate

Pupils should be taught to:

- Explore and evaluate a range of existing products.
- Evaluate their ideas and products against design criteria.

Technical knowledge

Pupils should be taught to:

- Build structures, exploring how they can be made stronger, stiffer and more stable.

Lesson sequence - include the key concept, L.O. and brief description of lesson

<p>WALT: explore the concept and features of structures and the stability of different shapes.</p> <p>Testing the stability of 3D shapes using a scientific approach.</p> <p>Success criteria</p> <ul style="list-style-type: none"> • I can identify natural and man-made structures. • I can understand what is meant by stability and identify when a structure is more or less stable than another. • I can explain that shapes and structures with wide, flat bases or legs are the most stable. • <p>Assessing progress and understanding</p> <p>Pupils with secure understanding indicated by: identifying man-made/natural structures; identifying stable and</p>	<p>WALT: understand that the shape of the structure affects its strength.</p> <p>Building and testing different paper structures to destruction.</p> <p>Success criteria</p> <ul style="list-style-type: none"> • I can understand the meaning of the words strength, stiffness and stability. • I can understand there are different ways to fold paper to improve its strength and stiffness. • I can build a strong and stiff structure by folding paper. • I can test the strength of my structure. <p>Assessing progress and understanding</p> <p>Pupils with secure understanding indicated by: understanding the meaning of the words strength, stiffness and stability;</p>	<p>WALT: make a structure according to design criteria.</p> <p>Designing a chair for Baby Bear by apply a knowledge of how to build strong and stable structures.</p> <p>Success criteria</p> <ul style="list-style-type: none"> • I can remember that chairs are structures that need to be strong, stiff and stable. • I can create joints and structures from paper, card and tape. <p>Assessing progress and understanding</p> <p>Pupils with secure understanding indicated by: working independently to use the materials as demonstrated to</p>	<p>WALT: produce a finished structure and evaluate its strength, stiffness and stability.</p> <p>Solving problems to adapt the structure of Baby Bear's chair as necessary.</p> <p>Success criteria</p> <ul style="list-style-type: none"> • I can identify that the chair I design needs to be strong, stiff, stable and support Teddy. • I can create joints and structures. • I can evaluate my structure according to the design criteria. <p>Assessing progress and understanding</p> <p>Pupils with secure understanding indicated by: producing a model that supports the teddy using the</p>
