inaccurate	When information is false and untrue.
index	A database where a computer saves key information about websites to make future searches faster.
keywords (internet)	A set of words used to define and produce an accurate search engine result.
search engine	A website that helps people find information on the world wide web.
TASK	Title, Author, Summary, Kids.
web crawler	A program that searches the world wide web using keywords in a systematic way to find the most relevant results for the user.
website	A collection of web pages and content that belong to a single domain, accessible through an internet browser.
www	Stands for world wide web and is found at the beginning of website addresses.

The screenshot shows the Kapowiverse website interface. At the top, there is a navigation bar with a search bar containing the text "Dinosaurs" and a "Go" button. Below the search bar are tabs for "All", "Images", "Videos", and "News". The main content area displays search results for "Dinosaurs". The first result is from "Dino website" with a "DINO" logo and a video thumbnail. The second result is from "Dinosaur directory" with a "DINO" logo and a video thumbnail. The third result is from "Jurassic history" with a "DINO" logo and a video thumbnail. The fourth result is from "London_apatosaurus" with a "DINO" logo and a video thumbnail. Annotations with orange callouts identify various elements: "search bar" points to the search input field; "company logo" points to the "DINO" logo in the first result; "hyperlink" points to the URL "https://www.dinosaurdirectory"; "keywords" points to the text "Dinosaur directory A-Z Dinosaurs"; and "fake news" points to the URL "http://www.London_apatosaurus".
